## INPATIENT PSYCHIATRIC PROGRAM

The cornerstone of our services is our inpatient psychiatric program. With a rich history of offering a safe, supportive environment where patients learn to identify and understand their mental illness, Summit Oaks Hospital remains the leader in private psychiatric care for children, adolescents and adults experiencing acute behavioral health symptoms.

We follow a proven process that helps identify each individual's needs through a comprehensive evaluation, crisis intervention and stabilization decision, and then offer dedicated inpatient programs and dual diagnosis care as needed.

## **INPATIENT PSYCHIATRIC PROGRAM**

Patients as young as 5 years of age learn to identify and understand their mental illness through a variety of therapies, including:

- A behavioral model point system for children and adolescents
- Individual and group therapy sessions
- Art therapy
- Pet therapy
- Alumni support groups (for adults)
- Intensive outpatient programs for continued support
- Self-esteem building programs for children and adolescents

*Summit Oaks provides a safe, supportive, non-judgmental environment for children, adolescents and adults. Summit Oaks Hospital is licensed by the state of New Jersey and is fully accredited by the Joint Commission on Accreditation of Healthcare Organizations (JCAHO).*
